

# IT'S EASY TO

# STAY SECURE

## security software

Install antivirus and anti-spyware software. Update them and the operating system regularly.

## wireless security

Know your network. Identity thieves prey on public and unprotected Wi-Fi networks.

## firewalls

A firewall is your computer's first line of defense. Ensure you enable it.

## phishing

Don't be a phishing scam victim. Reputable organizations will never ask for personal data, account numbers, or passwords via email.

## copyright

Get the facts on sharing and downloading music online. It's your job to ensure you're downloading and sharing legally.

Passphrase:

## passphrases

Choose strong passphrases, change them regularly, and **NEVER** share them with **ANYONE**.

## be safe with your computer

- lock your computer when walking away
- always remember to log out when finished
- never leave your laptop unattended, even for a minute
- follow these and other guidelines for staying safe online
